

Accounting Certificate

Program Breakdown:

Kick start your career in the accounting industry by completing a Certificate in Accounting. The courses in this program will help you understand the accounting cycle, financial statement preparation, payroll, receivables and payables, and the preparation of federal income taxes for individuals and businesses.

Major Courses :

- **Accounting Principles I:** An introduction to accounting concepts, principles, and practices is provided. The focus is upon the accounting cycle, the recording process, financial statement preparation, payroll and cash control.
- **Accounting Principles II:** Accounting concepts, principles and practices are continued. This course includes specific inventory methods, receivables and payables, bad debt, and valuation of plant and equipment. An overview of basic partnership and corporate transactions, cash flows, and cost principles is provided.
- **Tax Accounting:** The theory and practice of federal income taxes for preparation of individual returns and basic business returns are covered. IRS structure, federal tax forms and schedules, and computerized tax packages are also included.
- **Business Principles:** This course provides a survey of the organizational and fundamental operations of business enterprises and the concepts of the American economic system. Management, marketing, economics, and finance principles are explored to give insights into business in the global economy.

**There are so many benefits in getting a certificate,
we've highlighted some of the best below!**

- Certificates can be completed in less time than a degree.
- This Certificate costs \$2,500 with an affordable payment plan available.
- All courses are facilitated by credentialed instructors.
- Books are included at **no extra cost!** We even ship them to you!
- Flexible course schedule to work with your busy life.
- Most certificates will articulate credits into the matching Bryant & Stratton degree program.
